Valencia Orange Trees on Rough Lemon Rootstock

Researcher reports all treated trees had an annual application of 4 to 5 pounds of AZOMITE® for a four-year period.

	Treated Trees			Control Trees		
	Healthy	Decline	Percent	Healthy	Decline	Percent
Start 7-15-77	1086	293	21.2	1173	242	17.1
Finish 7-5-81	1151	228	16.5	989	426	30.1

Researcher reported that the owner pulled all trees that appeared decline-affected, including about 135 AZOMITE® treated trees that the researcher believed had started to recover. Study concluded with a 22% decline decrease in the AZOMITE® treated trees compared to a 76% decline increase in the control trees.
