

Murcott Orange Trees on Rough Lemon Rootstock

Researcher reports that this study was designed to test the effects of heavier treatments of AZOMITE[®]. Decline trees received 15 pounds of AZOMITE[®] spread by hand within the drip line and raked in by hand. Healthy trees received 10 pounds of AZOMITE[®] applied in the same manner.

Researcher reported all healthy trees remained healthy and 22 of the 25 decline-affected trees showed almost complete recovery.
